rooms will be available on a rate/space-available basis only.

Call **303-893-3333** and be sure to reference the "Rocky Mountain Hospital Medicine Symposium" when making reservations.

Transportation

24 miles from DIA. Airport shuttle available every 15 minutes 5am-6pm. Highway access via E/W I-70 and N/S I-25.

TARGET AUDIENCE

This program is designed to benefit physicians, nurse practitioners, physician assistants and clinical pharmacists.

Format

Program sessions integrate the most current scientific and clinical information and incorporate case-based learning methods. A discussion period after each presentation will be used to clarify and debate issues. Participants will also have the opportunity to visit industry exhibits.

Supported by: Astellas, Cubist, Elan, ESP, GlaxoSmithKline, King, Lilly, Merck, Ortho-McNeil, Pfizer, Sanofi-Aventis, Scios and TAP.

Learning Objectives

Upon completion of this program, the participant should be able to:

- Formulate and integrate effective strategies for improving pain control in the acute setting and enhancing end-of-life decision making.
- Identify and assess optimal strategies for the treatment of emerging resistant pathogens.
- Summarize current approaches in the management of acute coronary syndromes and congestive heart failure.
- Describe the latest advances pertaining to the prevention of venous thromboembolism.
- Identify effective strategies for the management of hyperglycemia in the inpatient setting.
- Integrate into practice the latest guidelines pertaining to the diagnosis and treatment of community and hospital acquired infections such as pneumonias, sepsis, and fungal infections.
- Outline recent advances in Advanced Cardiac Life Support.
- Define the opportunities and impact of clinical pathways in improving quality of care, promoting efficiency, and reducing health-related expenditures.
- Describe potential pitfalls associated with clinical pathway implementation and strategies to overcome these issues.
