TARGET AUDIENCE

This program is designed to benefit physicians, nurse practitioners, physician assistants and clinical pharmacists.

Format

Program sessions integrate the most current scientific and clinical information and incorporate case-based learning methods. A discussion period after each presentation will be used to clarify and debate issues. Participants will also have the opportunity to visit industry exhibits.

Learning Objectives

Upon completion of this program, the participant should be able to:

- Assess and apply effective strategies for the management of hyperglycemia in the perioperative setting.
- Describe the latest advances pertaining to the prevention and treatment of perioperative venous thromboembolism.
- Integrate into practice the latest guidelines pertaining to the diagnosis and treatment of hospital and community acquired infections.
- Formulate and integrate an evidence-based approach to post-surgical pain management in the hospital.
- Identify effective strategies for maximizing successful outcomes in the stroke/TIA patient.
- Summarize current approaches in the management of acute decompensated heart failure.
- Discuss the current treatment options for hyponatremia and their importance in clinical practice.
- Identify the most current strategies for optimizing hydration and medication administration.
- Outline current opportunities and challenges for the hospital-based clinical pharmacist.

Supported by: Astellas, Baxter, Cubist, GlaxoSmithKline, Merck, Ortho-McNeil, Pfizer, Sanofi-Aventis, Schering-Plough and Scios.
