Food and Drink Policy 9th and Colorado and DDC Campuses

- Eating, drinking, applying cosmetics, or any activities that increase the risk of ingestion of hazardous chemical, radioactive, or infectious materials are prohibited in areas where these materials are used.
- Food and Drink must be stored and transported in sealed containers.
- Storage of food and beverages are not allowed in refrigerators, cold rooms or ice chests that contain any hazardous chemical, radioactive, or infectious materials. Storage of food and beverages is prohibited except in designated break areas away from laboratories.
- Cups, water bottles and other food and beverage items are not allowed in laboratory areas.
- Food stored in the laboratory that is used for research must be labeled “Not for human consumption”.

These polices are in accordance with the Centers for Disease Control and Prevention’s [Laboratory Biosafety Level Criteria](#) and our RAM license.
