UNIVERSITY OF COLORADO DENVER

VICE CHANCELLOR'S LETTER

This Annual Report of Sponsored Program and other Restricted Fund Activity provides a comprehensive overview of the extraordinary success of research at the University of Colorado Denver during Fiscal Year 2008. The University of Colorado Denver (UCD) is a diverse teaching and learning community that creates, discovers and applies knowledge to improve the health and wellbeing of Colorado and beyond. This report highlights 2,207 projects that bring funding to the State of Colorado and have the potential to improve lives through research and education.

During Fiscal Year 2008, the number of UCD sponsored project awards increased 3% and were valued at \$372M; representing an approximate 2% increase in funding compared to the prior fiscal year. This is an extraordinary accomplishment given the continuous reduction in funding opportunities for our talented faculty. Of special note is the Colorado Clinical Translation Science Institute Program awarded to UCD in April 2008. This prestigious award will bring over \$76M to Colorado during the next five years and represents the collaboration of all UCD faculty from both campuses.

Final steps in the University of Colorado Denver consolidation process took place with the establishment of the Office of Research Development and Education and the movement of all sponsored program management to the Office of Grants and Contracts. Both offices are poised to provide strategic support to UCD faculty in the pursuit of extramural funding growth.

Within this report are lists of the top 50 funded projects for both UCD campuses. These lists represent only a snapshot of the extraordinary talent of the UCD faculty. I wish to congratulate our entire distinguished faculty for their continued efforts, talent and persistence in the advancement of science during very constrained times.

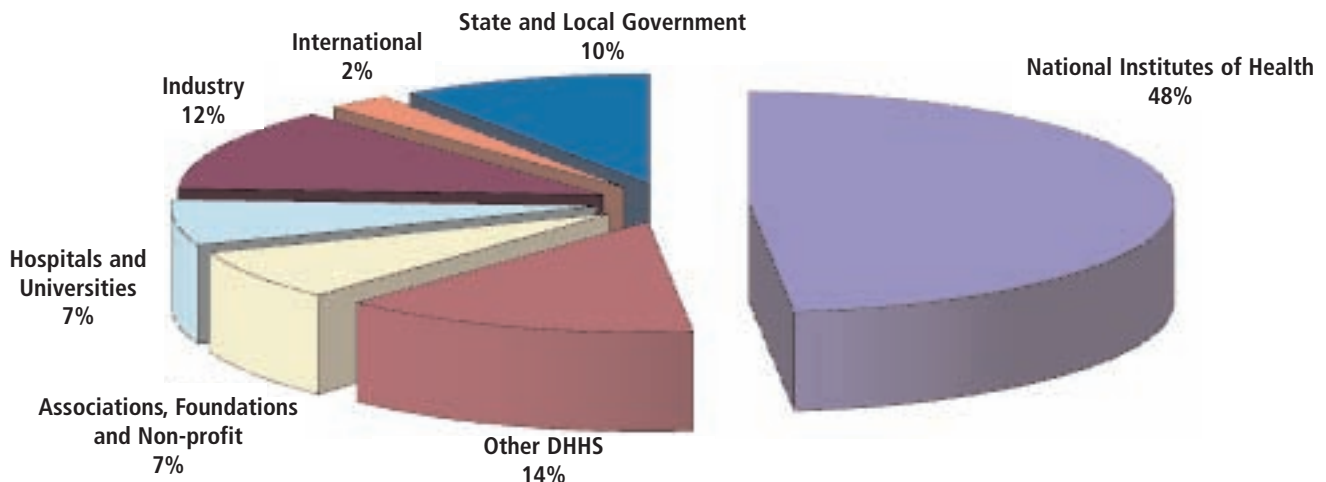

Richard Traystman, Ph.D.
Vice Chancellor for Research
